About Us

Spectator Seating

01

Company Profile

Evo Velocity Sports Company is the leading professional supplier for Stadium Seating and Sport Surface Materials, involving in the design, production, sales and installation service.

With more than 10 years' experience in spectator seating industry, we offers one-stop solutions including retractable bleachers, metal structure bleachers and stadium seats. We are located in Shenzhen with convenient transportation access.

Dedicated to strict quality control and thoughtful customer service, our experienced staff members are always available to discuss your requirements and customer satisfaction.

Our company has introduced a series of advanced equipments including CNC shearing machine, bending machine , punching roll line, CNC punch machine, power coating line, welding robots, about 10 injection molding and blow molding machines and etc. We have also recruited about 12 professionals dedicated to design, research and development. In addition, we have obtained ISO9001, ISO14001, OHSAS18001, CE, TUV, SGS and China Sports test certificates. Regarding the factory, we are expanding our new factory, about 14,000 square meters, which is expected to be completed in October 2023. Welcome all our customers to visit our factory!

01 Company Profile

Evo Velocity Sports has done many famous international projects, such as the 2018 Russia World Cup, the 2021 Southeast Asian Games, the 2022 Qatar World Cup and etc. At the same time, we have also undertaken many large-scale projects of national stadiums, such as the Kasarani Stadium in Kenya, the Stephen Keshi Stadium in Nigeria and Thailand stadiums.

Our products are selling well all over the world including America, Canada, German, Australia, Japan and other countries. Adhering to the business principle of mutual benefits, we have had a good reputation among our customers because of our perfect services, quality products and competitive prices. We also welcome OEM and ODM orders. Whether selecting a current product from our catalog or seeking engineering assistance for your application, you can talk to our customer service center about your sourcing requirements.

Technical Team

Personalized program design

According to the needs of customers, we provide professional personalized program design services to meet the different needs of customers.

Strong product technical background

Evo Velocity Sports product overall frame design and manufacturing solutions come from world-renowned manufacturers of event stands and outdoor steel structure metal stands, and dozens of technical improvements have been made through actual production and installation. The safety of product structure design and operational reliability have reached World class.

Install technical tracking support

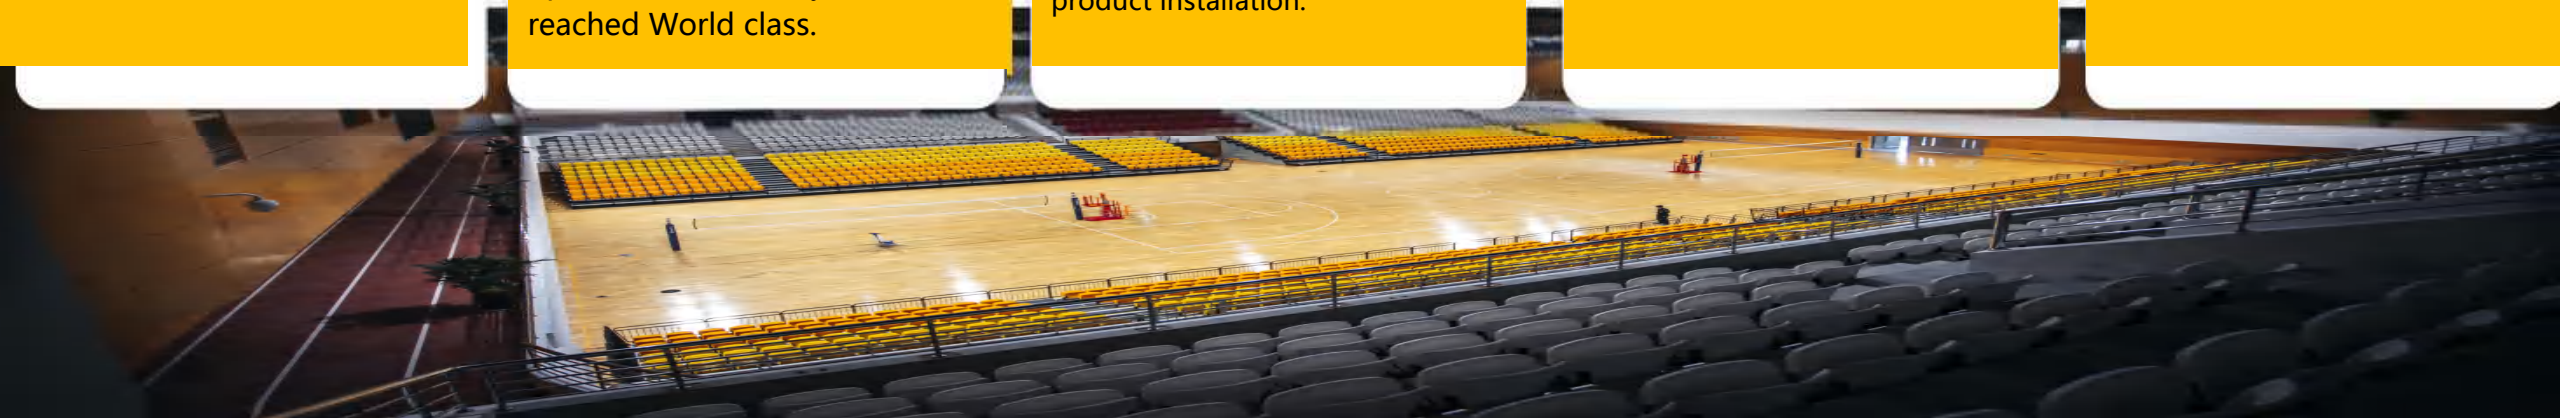

Whether the installation quality and technology are professional is very important to ensure product quality and use. Flyon Sports provides a complete set of tracking technical support services from the entry of goods and materials, the entry of installation equipment and the connection of various processes to the quality of the completion of the installation project. Guarantee the effect of product installation.

Strong engineer team

In terms of manufacturing and technical research and development of stadium stands, after years of precipitation and accumulation in the industry, we have a strong team of engineers. According to the actual requirements of different venues, we can always provide you with a perfect venue seating solution through seat arrangement and various types of seat matching.

After-sale technical support service

Provide customers with professional after-sales service, covering spare parts, common troubleshooting, emergency plans and other aspects, to solve all worries for customers.

04

Development P

2015-2016 Company Expansion

Evo Velocity Sports main business is stadium seating. In recent years, we have begun to expand the business of a series of sport surface materials, such as artificial grass, event flooring, running track and etc. And we also made some achievements in foreign trade export!

01

Fixed Seat

Blow
molding
seat

Air
injection
seat

Fixed seats are seats set up for audiences, athletes, media and other crowds in stadiums, lecture halls, and movie theaters. It is mainly made of high-density polyethylene (HDPE) by blow molding process and hollow structure. The overall design of the seat is in accordance with ergonomics and fits the curve of the human body to the maximum extent.

Shell

with cupholder armrest

1

Design

The seat shape is reasonable and the appearance is beautiful.
Rich color matching.

2

Material

Primary Material: High Density Polyethylene (HDPE).

3

Performance

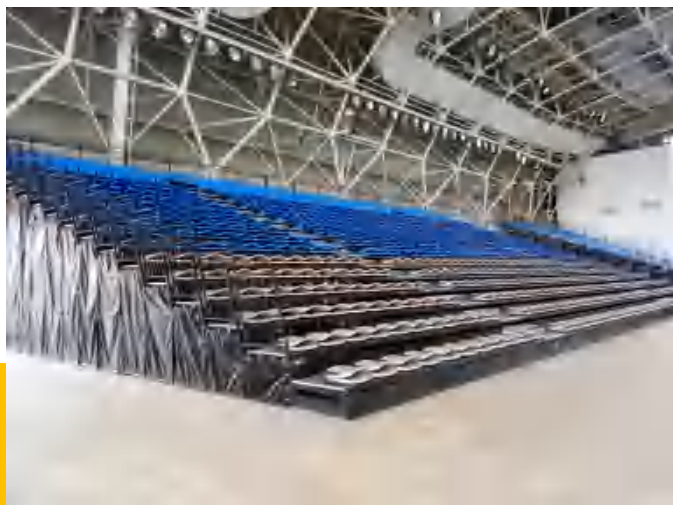

Meet the requirements of "Public Seats in Stadiums" (QB/T2601-2003).

**Seats comply with national standards and have passed multiple tests.
Flame retardant up to B1 level!**

02

Retractable bleacher

Front
mounted
retractable
bleacher

Rear-folding
retractable
bleacher

The retractable bleacher is composed of seats, pedals, ladder risers, and retractable bottom brackets. At the same time, the system has a variety of row spacing and step heights to meet the requirements of space and sight. The telescopic methods are divided into manual and electric operations. Because of its flexibility, it has a variety of different storage methods, such as wall-mounted, mobile, and wall-mounted. Widely used in various large sports venues, schools and multi-functional conferencehalls, e-sports halls, theaters, concert halls, etc.

Nova

Size:455*304*235mm

Material: HDPEProduction

Tech: Blow Molding

Application: Scholls, Sport center, Gymnasium.

Shell

Size:480mm*552mm*780mm

Material:PPProduction

Tech: Air Injection

Application: Concert hall, StudioMeeting room,
Venue, Auditorium,Multi-function hall.

Mate

Size:460mm*542mm*512mm

Material: HDPE

Production Tech: Blow Molding

Application: Scholls, Sport center, Gymnasium.

Rear-folding retractable bleacher

Mate

Suitable for medium and large stadiums and is the first choice for holding large-scale events.

Shell

Suitable for venues in large stadiums with higher budgets.

Honor

Suitable for studios, lecture halls and venues that have certain requirements for seat comfort.

1

Design

The bottom structure adopts a diagonal support structure design, which ensures that the direct spans of the two supports in each row are consistent. The support point is the best point for the structure to bear the force, and the bearing capacity of each row is the same.

2

Material

The steel is made of Q235A, and the surface is hot-dip galvanized.

The pedals are made of 18mm laminate, and the surface is covered with wear-resistant, fire-resistant and non-slip PVC. The seat can be equipped with blow molding seat, seat with sofa cushion and so on.

3

Performance

Meet the requirements of "Public Seats in Stadiums" (QB/T2601-2003).

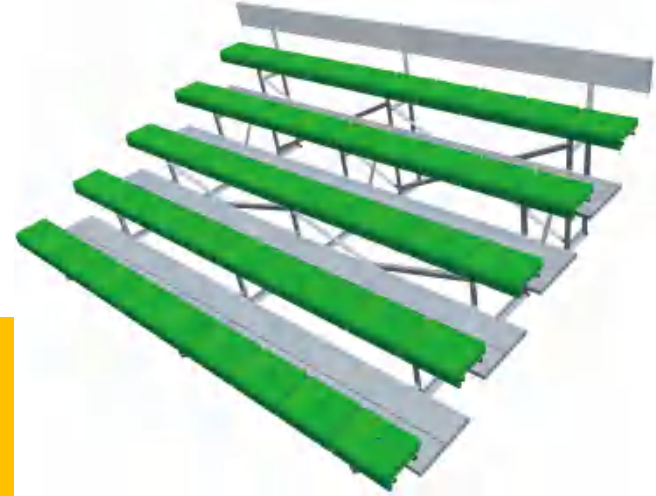

The main advantages of the retractable bleacher are its high flexibility, safety and high value. The limited space can be used infinitely, bringing a new concept to stadium seating.

03

Movable Aluminum Bench

3 rows
aluminum
bench

5 rows
aluminum
bench

The mobile aluminum bench is a small bench system composed of aluminum profiles, wood boards, and stools. It is a small bench system composed of aluminum profiles, wood boards, and stools. It is generally equipped with mobile casters, which are small-scale use or temporary addition. The best choice for the seat, after use, is just to erect the bench and push the matching universal wheels of the bench itself, and the bench can be easily moved to a safe space for storage.

04

Metal Structure Bleacher

Fixed
aluminum
bleacher

Temporary
bleacher

H-Beam
steel
structure
bleacher

The metal structure bleacher is composed of bottom steel structure support system, pedal system, seat system, safety protection system and other structures. According to the different steel structure materials at the bottom, metal structure bleachers can be divided into angle steel structure bleachers, scaffold structure bleachers, rectangular tube structure bleachers and H-Beam steel structure bleachers.
